Team Building - The NASA airspace game - Handout #1

Problem statement:

You are one out of five members on a expedition to the moon. Your lunar space craft has crashed on the moon about 200 Miles away from your lunar escape module. You'll have to find your way to your lunar escape module. Both, lunar space craft and lunar escape module are located on the sun side of the moon. There are no alternative options to get to earth.

It's not possible to carry all the objects you have in your lunar space craft. So you'll have to rank all the objects. But remember there are only 30min to do this activity .

First every team member ranks the objects on their own. Use Handout #1 for your individual solution. Than collaborate with your team to find a team based solution. Use the overhead slide of Handout #1 for the team solution so you can present it later.

Remember time is 30min minus the time it took you to read this ;-)

Good luck!!!
